Developed by Tekt - Most Trusted Bone Conduction Headphones

Product Description

The Tekt Bone Conduction Headphones are built-in with ergonomic and lightweight design providing all-day comfort. These Open Ears Wireless Bluetooth Bone Conduction Headphones are user-friendly and keep your hearing unaffected and deliver the HD Stereo sound quality. As it is developed with Bone Conduction technology, it lets you be perfectly aware of your surroundings. Tekt Bone Conduction Headphones also have a set of features including sweat proof and ears free design. If you are wearing it while driving, running or cycling and can withstand sweat and rain.

Say Bye-Bye to Painful Ears

Features

Bone Conduction Headphones keeps your ears free as nothing plugged into your Cochlea (inner ears). That means you can hear the outside noise. Thus it saves your ears from getting damage.

Supports a wide range of applications

FAQ

Q. I have only 1 eardrum. Will I be able to hear music through both ears with these headphones?

A. Our headphones use bone conduction technology, which is mini vibrations that move through the cheekbones and go directly to the inner ear, neglecting the eardrum entirely. If you have a healthy inner ear, these headphones will be a solution for you.

Q. Why does it have a battery? Can we connect without it?

A. Battery is used for an amplifier that is essential to create vibration in bone technology. It won't work without a battery. You have to charge the battery through a USB cable for it to work.

Q. Can I wear it with thick prescription glasses?

A. Wearing Glasses with Bone Conducting will not be an issue. Our Bone Conduction Sunglasses are built-in very flexibly and so put the glass first then headphones as the glasses are less fall off.

Q. Can I use these headphones for making Skype calls?

A. Yes definitely, you use it making Skype calls because it has a microphone.

Q. Will this work while exercising?

A. Yes. I wear it while doing exercise. I also wear jogging and mowing the grass. And trust me I never had an issue of them falling off.

FAQ

Q. Is the battery rechargeable?

A. Yeah !! The battery is rechargeable. If you have any queries please do share with us via email to info@gotekt.com.

Q. How long does it take to charge?

A. Initially you have to charge the device for 5 to 6 hours. If you don't charge the device then there is a chance of low voltage taken by the BLE device and it won't be going to work properly. Requesting all customers to charge completely before using it.

Q. Does this product have a warranty?

A. Yes, it has 6 months of warranty.

Q. Does the Tekt Bone Conduction Headphone compatible with all smartphones?

A. Yes, It is compatible with all devices.

Q. What other components and control does it have?

A. It includes a charging cable and user guide. Yes, it has volume control i.e 3 buttons. Power on-off, volume up and down.

FAQ

Q. As I have a huge brain, will it fit my head?

A. Yes, definitely it will fit your head. Tekt Bone Conducting Headphones is the largest model of bone conduction headphones. Still, you have any queries feel free to drop us a mail on info@gotekt.com

Q. I wear prescription glasses. Can I wear it?

A. Yes, definitely. It's very comfortable with any glasses.

Q. Can I wear this while swimming?

A. Yes of course. We have built-in waterproof and sweatproof.

Q. How can I contact the gotekt team for support when in need?

A. You can mail us your query or any other product related issues to info@gotekt.com, and our team will get back to you shortly.
